

Heatmaps

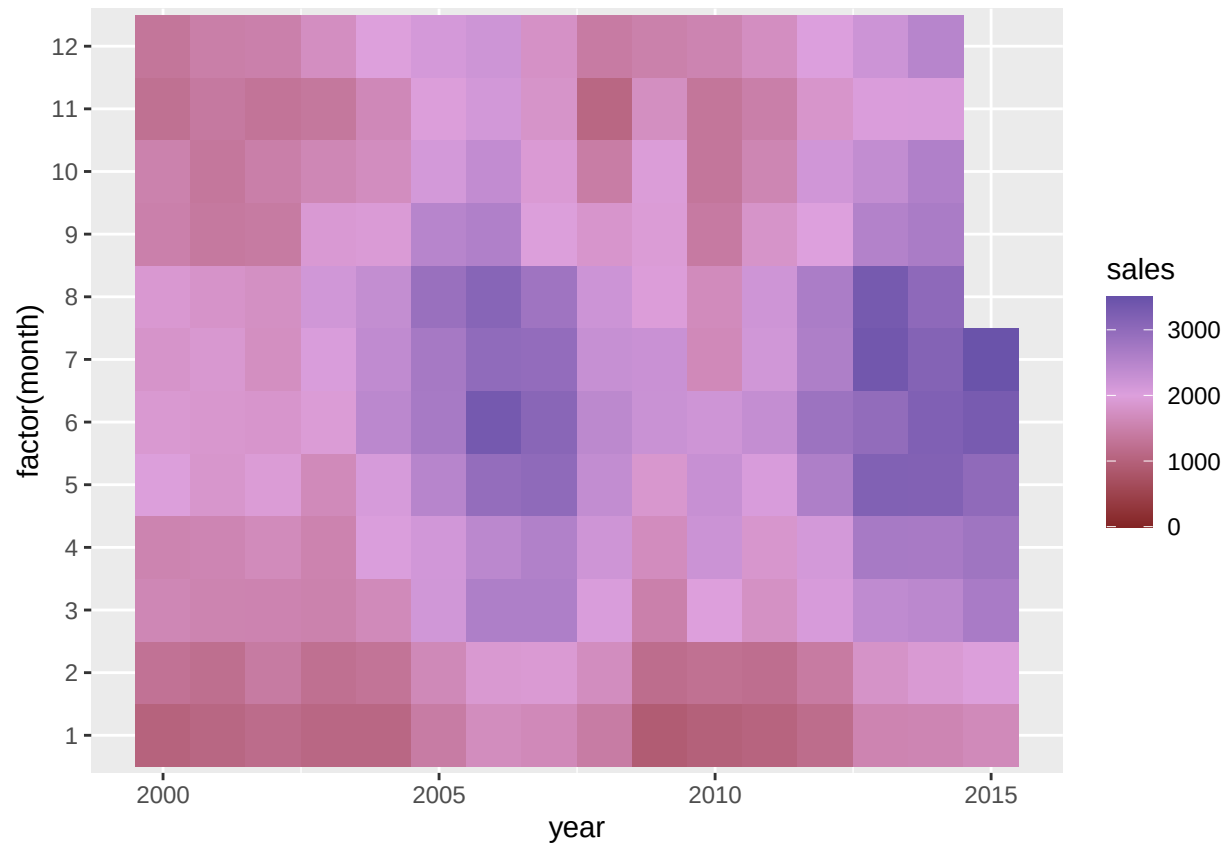

Noratiqah Mohd Ariff

Using geom_tile()

```
gs<-ggplot(Austin,aes(x=year,y=factor(month),fill=sales))  
gs+geom_tile()
```

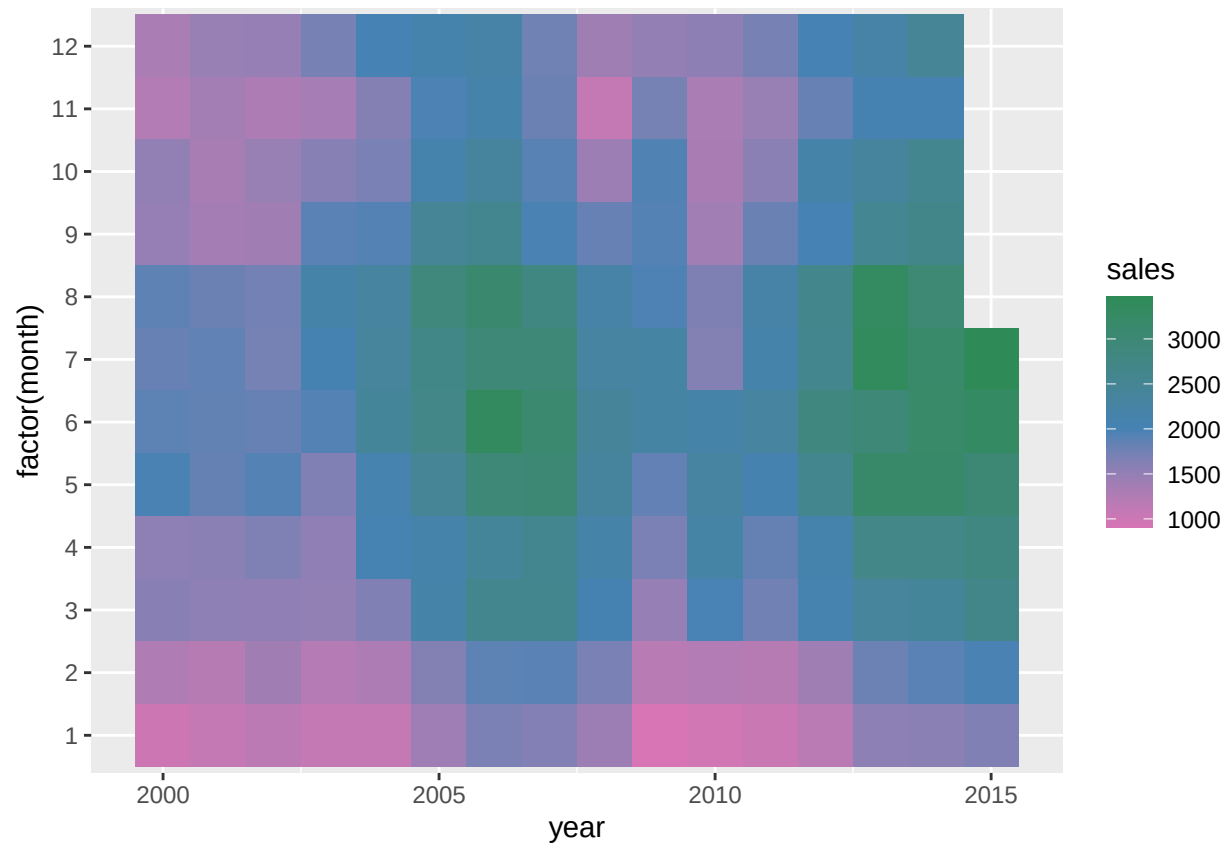

```
gs+geom_tile()+  
scale_fill_gradient2(midpoint=2000,mid="plum",limits=c(0,3500))
```

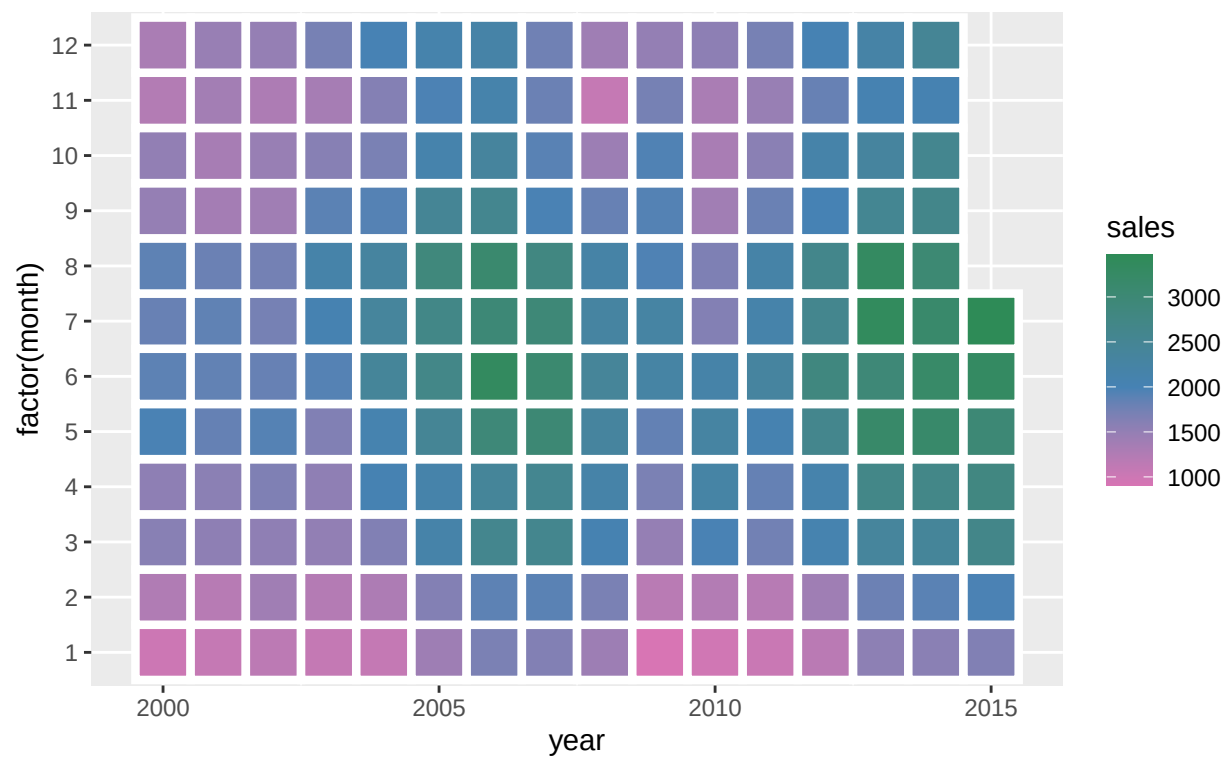

Using `geom_raster()`

```
gs<-ggplot(Austin,aes(x=year,y=factor(month),fill=sales))
gs+geom_raster()+
scale_fill_gradient2(
midpoint=2000,mid="steelblue",low="hotpink",high="seagreen")
```

Customize

```
gs<-ggplot(Austin,aes(x=year,y=factor(month),fill=sales))
gs+geom_tile(color = "white",lwd = 1.5,linetype = 1) +
scale_fill_gradient2(
midpoint=2000,mid="steelblue",low="hotpink",high="seagreen")+
coord_fixed()
```

Adding Labels

```
gs<-ggplot(Austin,aes(x=year,y=factor(month),fill=sales))
gs+geom_tile(color = "white",lwd = 1.5,linetype = 1) +
geom_text(aes(label = sales), color = "white", size = 2) +
scale_fill_gradient2(
midpoint=2000,mid="steelblue",low="hotpink",high="seagreen")+
coord_fixed()
```
